PRESS RELEASE

Cryogenic OGS Limited Secures Its First Independent Export Order in the Piping Spools Segment, Marking Breakthrough Entry into New Business Vertical

Milestone order validates the Company's strategic investment in prestigious approvals and certifications built over the past period, and marks the conversion of its Piping Spools vertical from capability to commercial reality.

Vadodara, Gujarat, India — 18th Sept, 2026: Cryogenic OGS Limited ("Cryogenic OGS" or "the Company"), a Vadodara-based manufacturer of cryogenic, metering, filtration and gauge equipment listed on the BSE SME platform (Scrip Code: 544440), today announced that it has received its first export order, secured independently, in the Piping Spools category, a landmark achievement for the Company's newest business vertical.

The order, valued at USD 2,022,816 (Two Million Twenty-Two Thousand Eight Hundred Sixteen US Dollars i.e. approximately Rs. 19.36 Crores.), has been placed by a Global EPC Company that specializes in bulk liquid storage terminals, refineries, and oil and gas process plants. Execution is scheduled to be completed within 12-20 weeks.

This order comes after a sustained period during which Cryogenic OGS invested in building the technical, quality and compliance foundation required to compete in the piping spools space, including securing prestigious industry approvals and certifications. The Company had identified piping spools as a natural extension of its core Infrastructure and engineering capabilities in oil and gas industry, and has been working systematically over recent quarters to convert this capability into an independently secured, revenue generating vertical.

The Piping Spools vertical is expected to complement Cryogenic OGS's existing manufacturing capabilities, leveraging the Company's infrastructure, quality control processes and engineering expertise built over its years of operation. The Company believes this order will serve as a reference project to support its efforts to secure further business in this segment, both from existing customers and new prospects across the oil & gas, energy and industrial sectors in India and globally.

This disclosure is being made in compliance with Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, and the Company confirms that neither its promoters nor promoter group have any interest in the customer, and that the transaction does not constitute a related party transaction.
